## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record, taken as a whole, does not show nor suggest the combination of limitations required by the claims. Donlan '286 is considered the closest art. Donlan discloses a gap seal between adjacent turbine components. The components have grooves facing each other and each having a compensating body with a receiving groove 25, 26 for receiving a sealing body 23 therein. Donlan fails to disclose at least the required shapes for the receiving grooves and sealing body. Also, it appears that the compensation bodies are not intended to be movably positioned in the grooves as required by the claims. Quinson '805 discloses a gap seal with the claimed shapes. However, Quinson fails to disclose the required arrangement of the seal. For example, the compensating bodies 2 and 4 are not each received in a groove in each of the components as required by the claims. The other art of record shows various turbine and expansion joint seals. None disclose the combination of limitations required by the claims, nor does there appear to be motivation to modify the art in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
